Overview

The humidity and temperature sensor module that uses the I²C standard for communication can thus easily be used on most existing development boards.

The presence of the supply voltage on the I²C 3V3 port is indicated by the "On" led located on the module.

For minimal power consumption, the "POWER" led can be disconnected using the "Cut to disable Power led" jumper located on the back of the pcb.

I²C 3V3 connectors are compatible with Qwiic (SparkFun) and STEMMA QT (Adafruit) standards.

The sensor output (temperature and humidity values) is digital in I²C format.

Technical specifications

Supply voltage: **3.3V DC**

Measured temperature: **-40°C ~ 120°C**

Humidity: **0~100%RH**

Communication protocol: **I²C**

I²C address: **0x38**

Connector type I²C 3V3: **SH 4P**

I²C 3V3 connector pitch: **1mm**

Legal disclaimer notice

This development board is considered a subassembly in accordance with FCC CFR Title 47 §15.101(e):

[https://www.ecfr.gov/current/title-47/chapter-I/subchapter-A/part-15/subpart-B/section-15.101#p-15.101\(e\)](https://www.ecfr.gov/current/title-47/chapter-I/subchapter-A/part-15/subpart-B/section-15.101#p-15.101(e))

The device does not have a standalone functionality and does not include an enclosure or power supply.

The device is mainly intended for development and prototyping but it can be integrated into a product. In this case it is the responsibility of the developer/manufacturer to obtain all the necessary certifications.
